
Lecons Invariants Integraux Cartan Elie Hermann

on the integral invariant of relativistic hydrodynamics - cartan adopted for classical hydrodynamics in his *leçons sur les invariants intégraux* (3). one will see how cartan's viewpoint, by its very nature, lends itself well to such an extension, along with everything that the theory gains in terms of clarity and coherence.

functionals of r-dimensional manifolds admitting ... - functionals of r-dimensional manifolds admitting continuous groups of point transformations* by aristotle d. michalf 1. introduction. the study of integral invariants was initiated by h. **258 8682 lcs/ai mit n95-25803 iqmo mq p,/ullm,,zlt**
